

The logo for Callaham Amps, featuring the brand name in a cursive script on a light-colored rectangular background.

These amps are not copies of existing designs that seem to proliferate the "Custom Amp Market." I truly believe that my amps are the best sounding and best looking on the market today. In fact the people that now own a Callaham amp, have a variety of other amplifiers for sale!

I will spare you all the usual adjectives to describe the sound of the amps. I will just say they sound good. REAL GOOD. A demo tape is available for \$5.00 so you can decide for yourself. I guarantee you will like the tape, and if you don't, return the tape for a refund.

We also sell some of the **parts** used on our amplifiers.

EL34 Amp features:

- Power: 28 watts
- Tubes: (2) EL34 Svetlana tubes in high class AB with (3) 12AX7 tubes
- Controls: volume, treble, middle, bass, presence
- 2 Speaker output: 4, 8, 16 ohm impedance
- Price: \$1,275.00
- Options: GZ34 rectifier \$60.00 extra

EL84R Amp features:

- Power: 25 watts
- Tubes: (4) EL84 Sovtek tubes in class A cathode bias with (2) 12AX7 tubes
- Controls: volume, treble, middle, bass, presence
- 2 Speaker output: 4, 8, 16 ohm impedance

- Price: \$1,350.00
- Option: GZ34 rectifier \$60.00 extra

EL84V Amp features:

- Power: 20 watts
- Tubes: (4) EL84 Sovtek tubes in class A cathode bias with (3) 12AX7 tubes and a GZ34 rectifier tube
- Controls: volume, treble, bass, brilliance
- 2 Speaker output: 4, 8, 16 ohm impedance
- Price: \$1,400.00

Features of all three Amps

All amps are a hand-wired point-to-point design on phenolic boards. Carbon film resistors, Sprague electrolytic and orange drop caps, CTS and Clarostat pots and solid core teflon insulated wire are used throughout. Output transformers are a paper wound 7-interleaved design. The chassis is a .070" aluminum folded and welded design that is extremely strong and made to handle road travel. 1/6" lexan (plexi) is used for the control panels, with a gold faced for the front panel and a cream faced for the back panel.

The cabinet is made from 3/4" Honduran Mahogany or Cherry and either flamed Birch or Maple trim. Cabinet woods may vary depending on availability of the Mahogany or Cherry. Both are quite beautiful.

Terms: At times, amps will be in stock and available for purchase. If not in stock, a \$200 non-refundable deposit is required to secure an amplifier. When your amplifier is complete, full payment will be required prior to shipping. 48 hour approval is given on all amplifiers. The current wait for a Callaham amp is six weeks.
