

Base Prices

Click on the model names for standard specs.

Satellite
\$1950

The Satellite is an offset, single cutaway, all mahogany guitar with 2 P-90's and a 25" scale. The mahogany is warm and the custom wound Fralin P-90's are big on midrange when used clean and extremely powerful when overdriven without being harsh. Simply classic!

Satellite MT
\$2100

The MT takes the Satellite concept one step further with the addition of front and back body carves, a figured maple top and humbucking pickups. The carves are graceful and make the body more ergonomical. The maple top adds midrange and clarity to the warm mahogany and the humbuckers expand the tonal spectrum.

Satellite DG
\$2300

The DG is based on the guitar I built for former XTC guitarist Dave Gregory back in 1996. It features a mahogany body and neck and a 24-3/4" scale. I've made a few improvements to the original by giving the peghead a 14 degree angle and replacing the Gretsch re-issue pickups that I used in Dave's guitar with TV Jones Filtertrons. Unlike typical humbuckers, the Filtertrons are amazingly clear and articulate with a tight bottom end and loads of sparkle on top.

Satellite TL
\$2400

The Thinline Satellite is lightweight and beautiful. Available with or without the "pipe" soundhole. Dropping these TV Jones Filtertrons into this semi-hollow alder and maple body produces a rich, full sound with great low, middle and high end. The maple neck contributes to a clear and pronounced tone.

Orbiter
\$1950

The Orbiter is a double cutaway version of the Satellite and also comes standard with a mahogany body and neck and 2 P-90's. As with any of my guitars it can be ordered with an unlimited number of options to suit your individual needs. Create your own classic!

Orbiter MT
\$2100

The Orbiter MT has a sleek, asymmetrical, double cutaway, mahogany body with a carved figured maple top, a mahogany neck and 2 humbuckers.

Partridge
\$2500

The Partridge guitar is the result of my collaboration with legendary singer/songwriter/guitarist Andy Partridge of XTC. Andy had essentially requested that I build him a solid body electric guitar wrapped in the timeless lines of a 3/4 scale classical guitar. The first prototype was built in 1996 and over the years we've made a few changes to improve upon and streamline the original concept. The chambered mahogany body has a concealed maple core and a bound Sitka spruce top. Its look is the only subtle thing about it.

Partridge Cutaway
\$2500

The Partridge Cutaway shares all the same features as the Partridge but the cutaway body style improves access to the upper frets.

Tonestar I
\$2700

The Tonestar I has a double cutaway, semi-hollow maple body, a figured maple top, a maple neck and 2 mini-humbuckers. The semi-hollow body makes for a lightweight guitar with a very clear tone and a warm low end. The maple gives it an open ring with good clarity, not harsh but very alive, both clean and dirty.

Tonestar II
\$2800

The Tonestar II utilizes the same body style as the Tonestar I but the mahogany back and neck, along with the full-size humbuckers, add another dimension, a thickness to the tone and give it a more pronounced and forceful midrange.

Gravitone

Right between the 25" scale guitar and the 32" scale bass guitar is my 28-1/16" scale baritone guitar. The standard sub-sonic 6-string sports a solid, carved alder

\$1900

body, bolt-in maple neck and 2 custom wound Fralin Tele bridge pickups. If you prefer the Orbiter or Tonestar body style you can order a baritone version of those models as well and their respective base prices apply. The Gravitone is strung with .015 -.080 gauge strings and tuned to 'A' or select the gauge of strings and tuning of your choice. Tune down for a whole new sound!

Rhythmstar**Bass****\$2500**

The 32" medium scale Rhythmstar Bass has a double cutaway, semi-hollow alder body, an alder top, a maple neck and 2 mini-humbuckers. The semi-hollow alder body has similar tonal characteristics to a solid alder body with a strong, clear and articulate punch. The independent volumes and coil taps allow a wide range of humbucking and single coil tones to come out of this bass, from Motown to Brit Pop to Rock and everything in between.

Options Pricing

Add option prices to model base prices. Other body woods, neck woods, pickups and hardware are available. Please contact me for pricing and availability if you are interested in an option not listed on this page.

Body
