Double Play...

Welcome to the Gerlitz Amplification Web Site!

The inspiration behind our G1 Revelator Dual Amp was a twofold challenge... first to combine two of the most beloved guitar amplifiers - a Fender 'blackface' and a Marshall 'plexi' - into one portable package, and then to achieve consistent full output tube tone at any volume level.

On this site we'll show you why, how and what we did to attain these elusive goals and a few of the surprising benefits that resulted.

Enjoy!

Harvey & Erick
