Handmade Guitars & Basses - Rare Bird Biography

Rarebird Guitars made from fine woods and finishes that accentuate the natural beauty of the grain. Made for the player that demands quality workmanship and performance.

Pick from a variety of [custom hand made guitars](#), [bass guitars](#), and [other instruments](#).

Rarebird, a trademark of Rarebird Guitar Labs located in Denver Colorado, uses as it's trademark the beautiful rare and endangered birds that are delicately inlaid into the head stock of each instrument. All electric, acoustic and bass guitars are hand crafted by Phillip Bruce Clay. Clay, a master Luthier, has devoted his life to producing fine instruments for musicians that demand high quality and durability. Over 29 years of practical experience.

Noted Rarebird features are, multi-laminate necks and graphite reinforcements for stability, heel less bodies with either neck-through or "set in" body for the best sustain and complete access to all frets. The Rarebird line includes semi-hollow body designs that achieve a rich full balanced tone.
