

## *About Us*

**At rbhDRUMS**, we manufacture quality, custom made drums for the discriminating percussionists. All of our drums are made by college trained percussionists, with many years experience. As well as a percussionists and student of the drum, he is a master craftsman skilled in the art of woodworking and joinery. He brings with him a through knowledge of wood behavior and its inherent characteristics, such as movement, acoustics, vibrations, tonal qualities, density and porosity. He also has a genuine love and respect for the beauty of natural wood.

We could bore you with wonderful little marketing phrases and try to impress you with slogans and terms that you may or may not be familiar with, but at **rbhDRUMS**, we value your integrity. We'll give you the straight scoop on our instruments. We want you to be as satisfied with your new instrument as we are. No drum ever leaves the shop that we wouldn't or haven't played prior to shipping...That's right, we play them all before they leave the shop.
