

## *Our Classic & Prestige Lines*

Snare drums are the cornerstone of any drumkit. They are the first drum purchased as a beginner. They are our most prized possessions as percussionists. Many of us have several to meet the requirements of any playing situation. There are those that have just one: that special ONE that meets all requirements. Whatever the case, an rbhDRUMS custom snare will compliment any collection.

**Our Prestige Snare Drums** are steam bent, one piece shells, in your choice of maple, or ash. We patiently steam each shell from a single piece of lumber, 1/4" thick, and bend it carefully in a specially made clamping system. We design our own clamping devices and steam boxes

After curing for a time,...(that is OUR recipe), we glue the scarf joints and sound reinforcing rings, then carefully cut the bearing edge and snare beds, and install the solid brass, custom made hardware. Our hardware is an **rbhDRUMS** exclusive design that enhances the tonality of each instrument. Each Prestige Snare is supplied with a 2.3mm steel rim as standard equipment. Die cast rims are optional. Snare throw offs are standard die cast, smooth action throw offs, with cast butt plates. Grover Performance Snares are supplied as standard equipment. Bright or Dark models may be selected. The finishes on our Prestige Snares are simply a hand rubbed oil finish. The reason we don't use lacquer finishes on our Prestige Snares is because the solid wood has to have breathability. Wood is a living entity that breathes and moves. It is a natural fact. For that reason, we use only an oil finish that will mellow and "sweeten" with age, letting the true, pure sound of the beautiful wood sing and not inhibit its natural movement.

**Our Classic Snare Drums** are a choice combination of a 10-ply shell coupled with a 6-ply sound ring. We hand cut and install each sound ring and precisely mill each bearing edge and snare bed. Our 10-ply snare shells produce a very nice high end crack as well as a full dynamic range. Our Classic Snares are available in many different finishes or veneered with an exotic veneer of your choice. If it must be wrapped, then we'll vacuum press the covering so it will act as an additional ply. Installed on your Classic Snare are the same tube style lugs that are on the Prestige Line, with the same smooth throw off. Steel rims are standard and die cast rims are optional. Grover Performance Snares are standard.

**Prestige Snare Sizes are:** 3.5x13, 4x14, 5.5x14

**Classic Snare Sizes are:** 5x10, 5x12, 3.5x13, 5x13, 4x14, 5x14, 6x14, 7x14, 8x14, 10x14
