

THE PRICE LIST*(last updated March 9, '99)*[Return to Main Page](#)

The process we use to determine the cost of an instrument is fairly straight forward. Simply determine the base price of the instrument you wish to have made for you, then add up the cost of whatever options or special features you would like and tack it onto the base price.

(Here is what is **included** in the base price)

The only other cost you will be charged other than this is your shipping cost. If you are anywhere in the US or Canada, the shipping will cost between \$70 & \$100 depending on the final value of the instrument. We send all of our instruments via Express Post Air and are fully tracked and insured. All packages will arrive to your door 2 days after sending it.
(For more [details](#) on our pricing and ordering info.)

All prices are in US dollars.
