

# WAY HUGE

## ELECTRONICS

### Info

Dear Guitarist,

Thank you for your interest in the Way Huge Electronics line of guitar effect pedals.

Quality, craftsmanship, integrity, and of course, outstanding tone are the hallmarks of Way Huge Electronics. All of our pedals are created with the needs of the guitar connoisseur in mind. As such, each Way Huge guitar effect pedal is meticulously hand wired with the highest quality parts available and equipped with true-bypass switching, LED indicator light, a power supply input jack and low-noise circuitry. Furthermore, these vintage style tone expanders are housed in a rugged anodized aluminum chassis (rust-proof!), and are carefully tested prior to distribution. All Way Huge Electronics products carry a limited lifetime warranty and are manufactured in the United States. This attention to detail enables us to produce guitar effects that not only can withstand a lifetime of use, but also provide exceptional tone.

For your convenience, we have also created this Web Site complete with sound bytes. This provides a viable solution to the pervasive "what does it sound like" inquiry.

If you have any questions or comments, please don't hesitate to call or email.
