

The **Zeidler Carrara** is a modified F-style mandolin designed for traditional as well as modern playing styles. For ease of playability in all positions, the Carrara features a widened maple neck and an arched fingerboard. High-quality precision tuning machines, along with the standard custom-designed hinged tailpiece, simplify string changing and tuning procedures. The top and back are carved, graduated and accurately tap-tuned to specific frequencies with special attention to tone bar fitting and placement. Sustain, broad tonal color and great carrying power make the Carrara a fine concert instrument.
