

The Jazz model's hand-carved top and back are graduated and tap-tuned to very close tolerances creating the big sound characteristic of a true acoustic arch top guitar. For ease of playability, the maple neck has a low profile design incorporating additional carbon fiber reinforcement making it light weight for comfort yet strong for stability. A spring fitted and tuned x-brace produces rich, even tone quality. The Zeidler Jazz is light and responsive with high clarity and lasting sustain for any playing situation.
